**FREEPOST TAYSIDE BIODIVERSITY**

**BUSY?**

# everyone is,

**but did you know that ...**

...throughout the UK, bumblebees are in decline, because of the loss of suitable habitat and changing agricultural practices. Tayside Biodiversity Partnership would like to collect as many sightings of our common bumblebees as possible from the local area. We are asking people to look for bumblebees in their gardens or local open spaces and send their sightings into us. You don't have to be an expert and it won't take up too much of your time. Just fill your address on this FREEPOST card and put it straight in the post, there's no need for a stamp. We can then send you everything you need to get started, including how to identify bumblebees, a survey sheet and lots of information. \*We will also enclose some FREE GIFTS (worth £8.50) as a thank you.

I would like to receive my Bumblebee Pack and FREE GIFTS
