Protecting our native  
freshwater pearl mussels

7<sup>th</sup> July - 7pm  
**SCOTTISH WILDLIFE TRUST**

**Montrose Basin Wildlife Centre**

## Pearl Mussels in the South Esk

### **Learn about freshwater pearl mussels**

Freshwater pearl mussels are a fascinating and important part of our biodiversity, Pearl mussels are a critically endangered species threatened by illegal exploitation. We need your help to protect them by reporting suspicious activities relating to pearl mussels.

Come along to this talk hosted by Natalie Young – Riverwatcher for the Pearls in Peril Project and learn about the history and ecology of this uniquely important species, and how you can protect them.
