

We need your help to see how well these 10 species are doing in our own patch. Many of them are found only in certain habitats, so we're not expecting to discover all ten in one village or town (although never says never!). Please use this sheet to record where and when you see them at any time up to 13th August - or share your observations with iNaturalist (details below). Use an extra page (or the back of this sheet if it's printed) for multiple recordings. If you are not signing up to iNaturalist, just email or post your findings to cagllloyd@pkc.gov.uk (Tayside Biodiversity Partnership, Pullar House, 35 Kinnoull Street, Perth. PH1 5GD). *Good luck!*

Oxeye Daisy	Harebell	<ol style="list-style-type: none"> 1. Sign up via https://uk.inaturalist.org/signup (and then you can add observations from anywhere in the world!). 2. Then find your village, town or neighbourhood here: Biodiversity Village Communities Mini Bioblitz · iNaturalist. 3. Add your observations (take photos first – this will also help to identify the species too).

If you have any difficulties with this online survey, just drop a line to either Clare at web@taysidebiodiversity.co.uk or Catherine at cagllloyd@pkc.gov.uk and we will help 😊

With many thanks to the Blairgowrie & Rattray Development Trust and its volunteers who designed the first version of this survey form.
